Property Swap

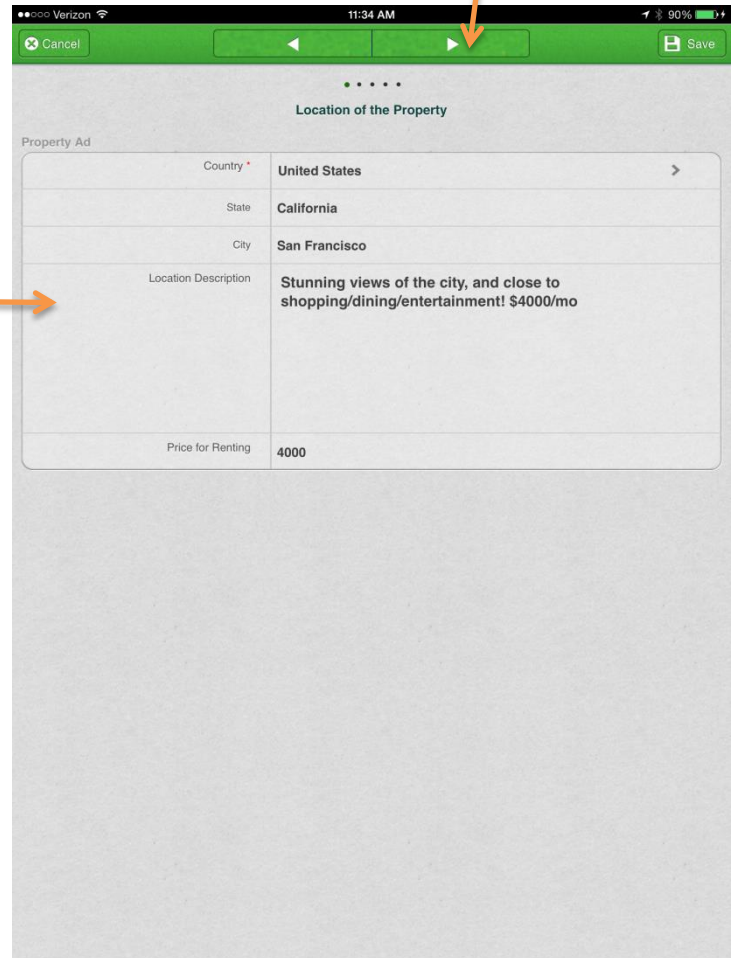

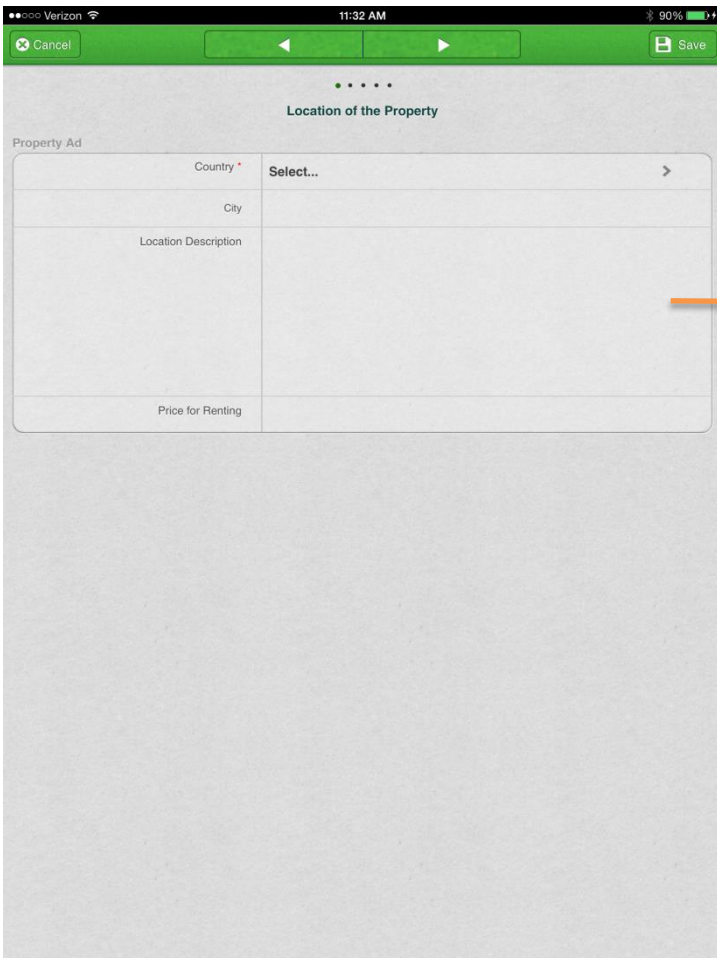

The following pages will show you how to quickly get started using this app, and demo some features that WAG™ offers you to add to any of your apps. This app allows users to swap properties with others. Instead of paying high prices for a hotel room, why not swap properties for free with someone else to your preferred destination?

1. A property owner would like to add his property to the app, so he clicks the + button at the top.

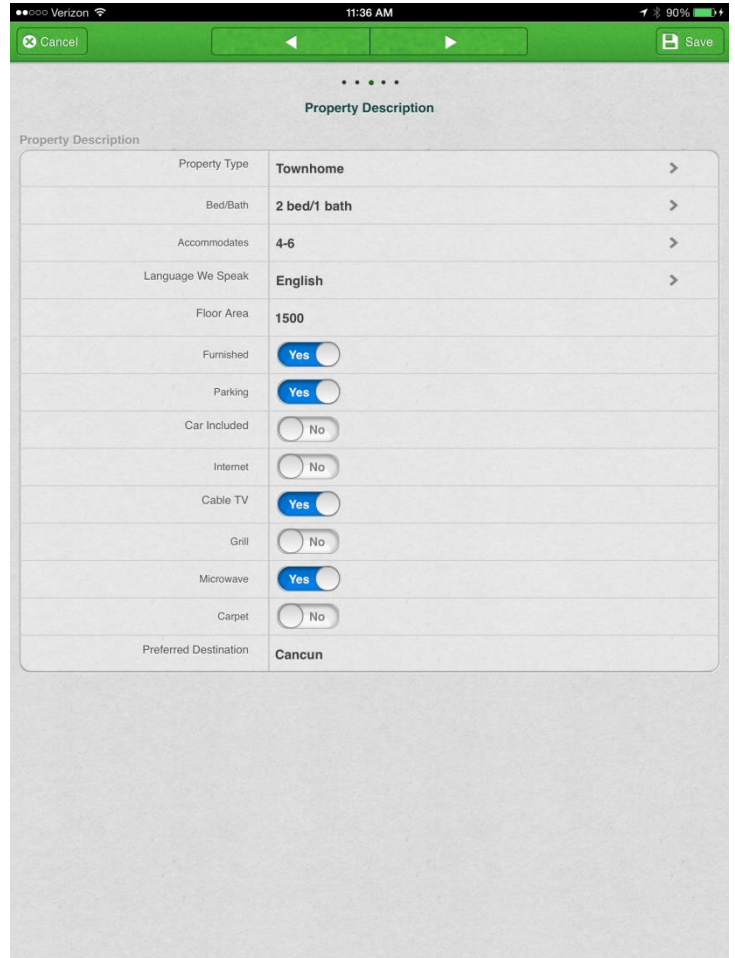

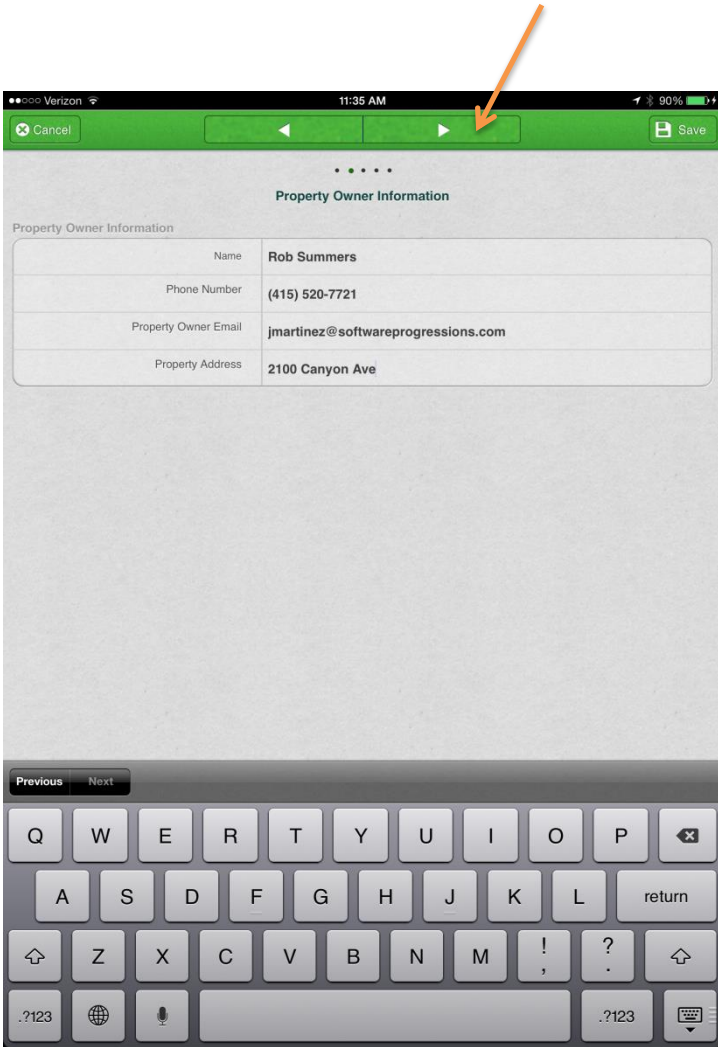

2. He starts by entering in basic property info, and then clicks the toggle to go to the next tab.

3. After entering basic property info, he enters his personal contact info, then, clicks the toggle to the right to enter more property details.

4. Finally, he adds some pictures of the property, and submits the ad.

Submit Ad

1. An app user (on Desktop) spots the property and quickly contacts the owner.

The screenshot displays a desktop application interface for a property listing. On the left, there is a vertical stack of images showing a bedroom, a kitchen, and a living area. The main content area is a table with the following data:

United States	San Francisco
Stunning views of the city, and close to shopping/dining/entertainment! \$4000/mo	
4000	
165	

Below the table, there is a section labeled "Owner:" with the following details:

Rob Summers
jmartinez@softwareprogressions.com
(415) 520-7721
2100 Canyon Ave, United States, San Francisco
jmartinez@softwareprogressions.com

On the right side of the interface, there are two buttons: "Property Overview" and "Contact the Owner". The "Contact the Owner" button is highlighted with an orange box. Below the buttons is a section titled "Pictures of the Property" with an "[Add File]" link and three images of the property. At the bottom right, there is a "Property Description:" section with the following details:

Property Type:	Townho
Bed/Bath:	2 bed/1
Accommodates:	4-6

- The app user enters all the details and sends the message to the property owner about a possible swap between their properties.
